

Rating	Professor	Institution	Department	State	Review
5.0	[Instructor A]	[Institution A]	Astronomy	[State A]	Professor [Instructor A] has great knowledge in Astronomy, while he can explain them in a super easy way in an elementary class. He taught this class with great passion and great illustration. This class is definitely fun to take. If you are interested in further knowledge that this class won\'t cover, don\'t hesitate to ask him. Great teacher.
3.0	[Instructor B]	[Institution B]	Political Science	[State B]	dude is huge and i mean huge and is a rude guy but he knows alot about politics
5.0	[Instructor C]	[Institution C]	Biology	[State C]	Had him for invertebrate zoology and parasitology, but sadly not entemology. Very tough, definitely. Yet, you learned a lot and will definitely never forget his classes. Tests were difficult, but fair. Too bad he retired. I\'ll miss his quirkiness ("Doo da...da da dee doo dum"-->anyone who had him understands) and enthusiasm. Thanks Dr. [Instructor C]!
