

Worked Example 1 — Review #5

Section 1: Clause Extraction and Categorization

Clause	Topic	Sim	Top 2 Emotions
professor [instructor] has great knowledge in astronomy, while he can explain them in a super easy way in an elementary class.	Instructional Effectiveness	0.430	admiration=0.889, approval=0.154
he taught this class with great passion and great illustration.	Instructional Effectiveness	0.570	admiration=0.957, approval=0.042
this class is definitely fun to take.	Instructional Effectiveness	0.480	amusement=0.674, joy=0.658
if you are interested in further knowledge that this class won't cover, don't hesitate to ask him.	Instructional Effectiveness	0.480	approval=0.401, optimism=0.042
great teacher.	Instructional Effectiveness	0.460	admiration=0.950, approval=0.034

Section 2: Baseline vs. Attenuated Feature Vector

Topic	Baseline Top 4 Emotions		Down-Weighted Top 4 Emotions	
Instr. Effectiveness	admiration=0.574, joy=0.134, approval=0.132	amusement=0.136,	admiration=0.574, joy=0.134, approval=0.132	amusement=0.136,

Miscellaneous	—		—	

Section 3: Validity-Weighted Attenuation

D_{misc}	ζ	Raw	Baseline	Attenuated	Δ	Adjusted
0.000	1.000	5.0	5.003	5.003	0.000	5.000

All clauses categorized as Instructional Effectiveness. $D_{\text{misc}}=0.000$ results in $\zeta=1.000$. No down-weighting is applied. The framework leaves the raw rating entirely unchanged.
